

Figure 1

Figure 2

Figure 3 is a block diagram of a system 100 for processing data. The system 100 includes a user interface 2, a data source 3, a data processor 4, a data storage 6, and a data output 34. The user interface 2 is connected to the data source 3. The data source 3 is connected to the data processor 4. The data processor 4 is connected to the data storage 6. The data storage 6 is connected to the data output 34. The data processor 4 is also connected to a data input 38. The data input 38 is connected to the data source 3. The data processor 4 is also connected to a data output 38. The data output 38 is connected to the data source 3.
